# Sports Fort

After Discussing with the team members regarding web design project proposal, we decided to create the “Sports Fort” website, which will contain written tutorials for famous sports played around the world, example: football, baseball, basketball, tennis, chess, and karate. Each with its rules, cups, popular and well-known players, legends, etc...

The website is mainly made for sports enthusiasts, for all ages, with a vision for clean design, well documented, and attractive overall experience, we agreed to follow our goals for this project:

1. Deliver a full explanation for each sport with easy-to-understand text with visuals.
2. Testing will be one of our priorities while developing the website to ensure the highest quality website possible.
3. Learning outcome is important for all team members.

Note: Sports included might differ from the proposal in the next phases...
